

Recent Electrical Appointments at Gowing & Hunt Limited

Building services company Gowing & Hunt Limited (Ely, Cambridgeshire) has responded to continuing growth within its electrical services business by appointing two new members to its team. David Pollard joins Gowing & Hunt as an electrical estimator from Imtech Aqua Building Services Ltd., where he worked most recently as a technical buyer. With over 30 years in the electrical industry behind him, Dave's all-round experience of estimating, quantity surveying, project managing and technical buying will assist G&H in securing further contracts to add to an already busy mechanical & electrical (M&E) services order book.

Paul Brown comes to Gowing & Hunt from Sias FM Limited and will work as a project manager within the company's electrical division. His broad experience of the electrical

industry will see Paul assume project management responsibility for the recently-secured M&E projects at Cambridge Assessments, a

department of the University of Cambridge, and the £1.6 million Keith Leonard House development in Soham, Cambridgeshire.

Commenting on the two new additions to the team, Mrs Mary Gowing, a director at Gowing & Hunt said: "We are delighted with the new appointments, both of which will bolster our already experienced team, and assist in driving forward the growth of our business, particularly in electrical services."

Gowing and Hunt Ltd. is a family-run business which has over 30 years experience in the building services industry. The company specialises in the design, installation and maintenance of mechanical, electrical, plumbing services and renewable technologies for the commercial, industrial, and education sectors in the East of England.
